

Christine Gandiya

Caldwell, ID | (786) 838 9338 | chrissyg298@gmail.com

<https://chris5934.github.io/ChrisWebsite>

Education

The College of Idaho, Caldwell ID

Anticipated Graduation: May 2026

Bachelor of Arts: Psychology, Mathematics-Computer Science

Minor: Art & Design

Specialization: Data Science

GPA: 3.85

Dean's List: Fall 2022 – Present

Honors Society: Psi Chi

Technical Skills

Programming & Data (Familiar): Python, R (RStudio), SQL

Data Analysis (Familiar): Statistical modeling, regression analysis, data cleaning, visualization (tidyverse, dplyr, ggplot2)

Tools: Excel (Familiar), Google Sheets (Intermediate), GitHub (Familiar)

Experience

Lead Research Assistant

2023-Present

The College of Idaho

- Conducted statistical analyses in R, including data cleaning, regression analysis, and visualization of research findings
- Prepared IRB materials and maintained research documentation to support protocol compliance
- Created data visualizations and presented findings at virtual and in-person academic conferences
- Contributed to manuscript preparation and collaborative research reporting

Course Assistant

2023-2025

Statistics, Calculus and Algebra

- Provided academic support across multiple sections of statistics, calculus, and algebra
- Guided students in statistics, calculus, and algebra through structured problem-solving and conceptual explanation
- Supported use of RStudio for statistical analysis and data visualization
- Assisted students in debugging statistical code and interpreting model outputs

IT Helpdesk

2023-2025

The College of Idaho

- Helped faculty and students troubleshoot password and software issues with clear instructions
- Regularly completed inventory on IT equipment, with careful attention to functionality for each item
- Assisted in network security by educating students and faculty on safe computing practices

Projects

Data Cleaning & Analysis Project

2024

Data Manipulation & Visualization

- Cleaned and analyzed a real-world dataset using R
- Handled missing data, resolved inconsistencies, and transformed variables
- Created visualizations to communicate key insights
- Presented findings with clear data-driven conclusions

SQL & Database Management Project

2024

Applied Databases

- Designed a relational database to store and query a dataset.
- Created and optimized SQL queries for data retrieval, filtering, and aggregation to support data analysis
- Ensured data integrity by implementing constraints and normalization techniques.

Data Modeling Project

2023-Present

Personal

- Developed spreadsheet-based models to simulate complex systems and analyze trade-offs
- Utilized advanced formulas (IFS, LET, INDEX/MATCH) to build dynamic calculators
- Performed scenario analysis to optimize outcomes under constraints
- Ensured accuracy through iterative testing and validation

Presentations

- Bright, L., & Gandiya, C. (2026) *Exploring the Differing Motivations for Advanced Calculus Taking and Planning*. Rocky Mountain Psychological Association Convention
- Bright, L., Gandiya, C., Ricciardi, C. (2025). Intention vs. Enrollment. Presented at the Electronic Undergraduate Statistics Research Conference, Virtual.
- Bright, L., & Gandiya, C. (2025) *Intention vs Enrollment*. The College of Idaho Student Research Conference
- Bright, L., & Gandiya, C. (2024) *Math identity and intentions to enroll in advanced calculus*. The College of Idaho Student Research Conference
